RE: Tradebe Treatment and Recycling of Tennessee, LLC - 2011 Export Report
TND000772186

Dear Mr. Heiss:

Pursuant to the requirements of 40 CFR 262.56, as a hazardous waste treatment, storage and recycling facility and an exporter of hazardous waste, Tradebe Treatment and Recycling LLC of Tennessee (Tradebe) is attaching a report identifying the types, quantities, frequency, etc. and ultimate destination of hazardous waste exported.

In response to 40 CFR 262.56(a)(5)(i), Tradebe is reducing the volume and toxicity of waste brought into our facility by recycling material through our multiple recycling technologies. Our SDS system, which has been in service since 2005, is a closed loop recycling system that utilizes solid waste feedstock to recover petroleum based hydrocarbons. Our distillation column came on line shortly after the SDS and is used to recycle solvent wastes and to produce commercial solvent products. In 2008 Tradebe installed a pot still, further increasing our solvent processing capabilities. In 2009, Tradebe finished the installation of a thin film evaporator, a high viscosity distillation system that Tradebe utilizes to recover many solvent waste streams that have required offsite disposal in the past. Each year, more and more of the material handled by Tradebe is recycled rather than being sent for disposal.

Thank you for your time regarding this matter. Please feel free to contact me if you have any questions at (800) 388-7242 ext. 2352 or email at Tita.Lagrimas@tradebe.com.

Respectfully,

Tita LaGrimas
Executive Vice President, Regulatory Affairs
